

## **Bryant Hendrickson, PE, CFEI Joins Blue Engineering and Consulting Company**

Baltimore, Maryland – March 18, 2019

Blue Engineering and Consulting Company (BLUE), an LNG engineering and consulting firm, is excited to announce the addition of Bryant Hendrickson to the BLUE Team. As a licensed fire protection engineer with several years of experience as a senior engineer for the Authority Having Jurisdiction of a federal installation, Mr. Hendrickson strengthens the diverse expertise that BLUE offers the LNG industry. Mr. Hendrickson's experience with managing the design, fabrication and installation of fire protection systems adds practical expertise to support the engineering design of fire protection systems.

Mr. Hendrickson has conducted numerous LNG facility siting studies under both federal and state jurisdictions, and is skilled at developing mitigation strategies for dispersion of flammable and toxic gases, thermal radiation hazards, and overpressures. His expertise in the use of process hazard analysis software and computational fluid dynamics (CFD) models will allow Mr. Hendrickson to bring added value to the exciting LNG projects BLUE is executing.

"Bryant Hendrickson's field experience and qualifications as a fire protection engineer add another valuable dimension to the BLUE team", says Dr. Filippo Gavelli, Consultant.

### **ABOUT BLUE**

BLUE specializes in Liquefied Natural Gas (LNG) facility design (feasibility and front-end engineering design), hazard analysis and siting studies, regulatory compliance, safety, and Owner's Engineering services. The BLUE team provides these services across the entire LNG industry including satellite facilities, small-scale production, bunkering facilities, fueling facilities, and import and export projects.
