

LNG Consultants Complete Launch of New Business

Baltimore, Maryland – September 10, 2018

Blue Engineering and Consulting Company (“BLUE”) is pleased to announce the completed launch of their new LNG engineering and consulting business. “It’s been a very exciting first two months getting us ramped up to full speed,” said Phil Suter, Consultant with BLUE. “It has been a lot of hard work from the BLUE team but the response and support from the LNG industry has been an incredible motivator.”

BLUE specializes in Liquefied Natural Gas (LNG) facility design (feasibility, pre-FEED, and FEED), hazard analysis and siting studies, regulatory compliance, safety, and Owner’s Engineering services. The BLUE team provides these services across the entire LNG industry including satellite LNG facilities, small-scale LNG production, bunkering facilities, fueling facilities, and world-class LNG import and export projects.

The BLUE team is composed of engineers and consultants with a long-standing reputation for their focus on the highest quality engineering services and their reliable expertise, as well as their innovative thinking in a rapidly growing industry. BLUE consultants continuously evolve their skills to stay ahead of on-going changes and obstacles facing the industry. This allows the BLUE team to provide unique solutions for each complex Project.

BLUE consultants have worked on numerous LNG projects across all phases of development. The BLUE team has worked for some of the largest development corporations in the world as well as some of the smallest private developers. “Our consultants are some of the hardest working and most recognized individuals in the industry, and we are thrilled for the opportunity to continue to innovate and grow the LNG industry,” said Suter.
