

	Job Posting	
	Regulatory Compliance Engineer	Page 1 of 2

Background

Blue Engineering and Consulting Company (BLUE), an employee-owned engineering and consulting firm specializing in providing engineering and technical support to the liquefied natural gas (LNG) industry, is looking for an energetic, highly motivated, and well-qualified Regulatory Compliance Engineer to join our team in Ellicott City, MD.

Job Description

The ideal candidate will be able to excel in a team environment. The team will look to you for assistance with regulatory compliance for FERC, DOT PHMSA, and USCG jurisdictional facilities, along with State AHJ compliance and development of regulatory solutions. The ideal candidate will possess a BS or higher degree in engineering.

Essential Functions and Job Responsibilities include:

- Assisting project developers by developing feasibility studies to help define regulatory requirements and solutions for LNG or related industry projects in their early stages,
- Communicating effectively in verbal and written form with clients and teammates,
- Developing pre-FEED deliverables and FEED deliverables which meet the requirements of NFPA 59A and other applicable codes and standards,
- Assisting projects through permitting and regulatory processes (including FERC, DOT PHMSA, USCG, and State AHJs),
- Assisting with the development of EPC bid packages and evaluating EPC bids to assist developers in selecting EPC Contractors,
- Providing regulatory compliance engineering services as Owner's Engineer reviewing EPC Contractor engineering deliverables in the detailed design, procurement, construction and commissioning/start-up phases,
- Participating in HAZOP, LOPA and other regulatory required studies,
- Supporting regulatory compliance audits, and
- Ability to travel by car, train, or plane to client work sites when necessary. Travel requirements will vary from client to client and project to project.

Required skills include:

- Familiarity with LNG facility designs,

- Familiarity with NFPA 59A, FERC, DOT PHMSA, and USCG requirements,
- Excellent verbal and written communication skills,
- Ability to multi-task across different projects and manage time and schedule commitments, and
- Excellent organizational skills.

BLUE offers industry-leading employee benefits such as a choice of preferred health insurance plans, 401(K) plan and an incredible profit-sharing program along with generous vacation and leave time to align with its culture of a healthy work-life balance for its team members.

Candidates must be authorized to work in the US and have a valid passport. A background check and drug test may be required as a term of employment.

Applications will be reviewed and received until the position is filled. To apply or learn more about BLUE, please visit our website at www.BlueEngineeringandConsulting.com or contact us at BlueTeam@BlueEandC.com.
